## tedee SMART LOCK

Tedee Smart Lock allows you to remotely control the lock along with access control from your smartphone.

### Parameters

- compatible with SLR lock cylinder
- the ability to enter the apartment, home, office without having to search a traditional key
- automatic locking
- remote opening the lock for guests, family or courier from any place
- sharing the digital key once, for a certain period of time or without restrictions – all depending on the access control management settings
- no need for an entry card: just use the app
- reliable operation for many years after assembly
- performance – operates after a full charge for about 6 months
- fast charging – one night's charging is enough to reach full battery level
- security – the elements included in the set are certified and repeatedly subjected to rigorous technical tests, and all data is encrypted using TLS 1.3 with a 256-bit key, considered the most secure of all available on the market
- simple installation and quick configuration according to the individual needs of all household members or office users

---	---	---	---	---	---	---	---

Cylinder classification acc. to PN-EN 1303:2015  
Certificate issued by the Institute of Precision Mechanics

satin nickel

### Specification

- modular cylinder for self-assembly
- modular construction of the cylinder (modules with lengths: 6 mm, 10 mm and 15 mm) allows to adjust the length of the cylinder to the door leaf thickness (maximum 136 mm)
- highest security class 6 according to PN-EN 1303:2015
- body made of brass
- highest burglary resistance class D
- 6 active pins
- equipped with anti-drill pins in the body and cylinder and a ball in the front of the cylinder
- equipped with anti-pick pins (mushroom and roller pins)
- proprietary key profile
- the set includes modules (2x 6 mm, 2x10 mm and 2x15 mm), a code card, five keys, set of allen keys, mounting screw

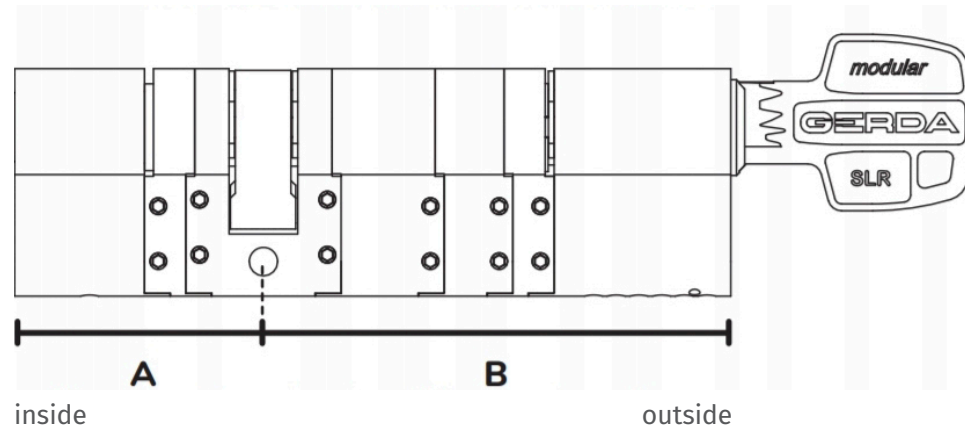

### Available options

- Keyed Alike system\*
- Master Key system\*
- two key profile variants available\*

\* available on special order

# EVO

## key-thumb turn

Modern anti-burglary cylinder with a key made of 'new silver'. The cylinder is highly resistant to manipulation by means of hand tools. It also has hardened elements to protect the cylinder mechanism against drilling.

- 🔑 Security class: 5
- 🛡️ Gerda product security class: 10
- 🔑 Number of keys: 5

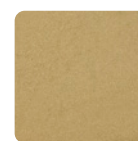

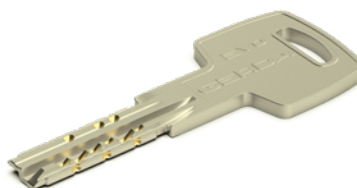

### Parameters

### Colours

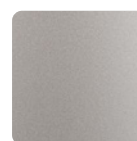

### Certificate

1	6	0	B	0	C	5	C
---	---	---	---	---	---	---	---

Cylinder classification acc. to PN-EN 1303:2015  
Certificate issued by the Institute of Precision Mechanics

brass

satin nickel

### Specification

- high security class 5 according to PN-EN 1303:2015
- certified for fire doors – according to the classification assessment of the Institute of Building Technology
- highest durability of the mechanism – over 100 000 cycles
- more than 9 300 000 possible key code combinations
- body made of brass
- burglary resistance class C
- two steel hardened nickel-plated anti-drilling pin in the body of the cylinder
- 12 pins: 9 in two rows and 3 side pins
- high resistance to corrosion
- anti-bumping protection
- hardened pins
- the set includes: code card, five keys made of 'new silver' with high durability and a fixing screw

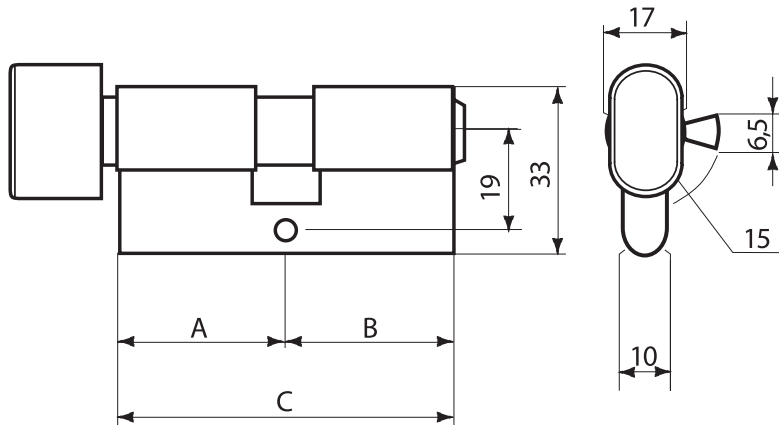

### Available options

- Keyed Alike system\*
- emergency function – for selected cylinders\*

\* available on special order

# WKE 1

## key-thumb turn

Basic brass cylinder compatible with a wide range of locks.

- 🔑 Security class: 2
- 🛡️ Gerda product security class: 6
- 🔑 Number of keys: 3

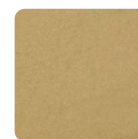

### Parameters

### Colours

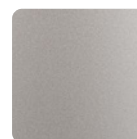

### Certificate

1	6	0	B	0	C	2	0
---	---	---	---	---	---	---	---

Cylinder classification acc. to PN-EN 1303:2015-07  
Certificate issued by the Institute of Precision Mechanics

brass

satin nickel

### Specification

- key code security class 2
- 5 active pins
- highest durability of the mechanism – over 100 000 cycles
- certified for fire doors
- body made of brass
- high corrosion resistance
- the set includes three keys and a fixing screw

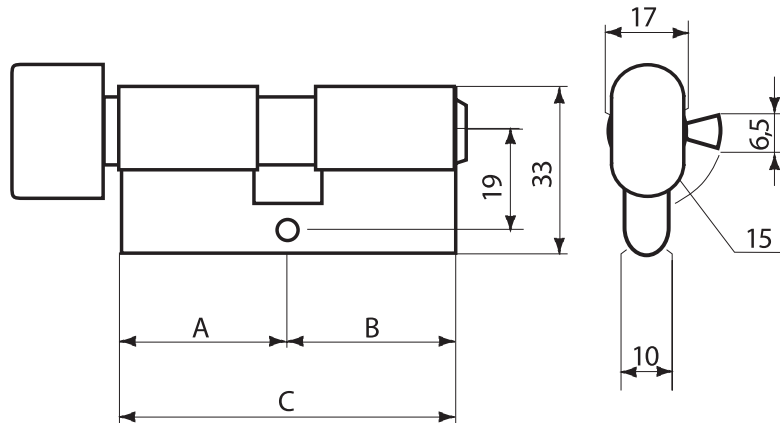

### Available options

- Keyed Alike system\*
- optionally with additional number of keys\*

\* available on special order

## RIM E1

Basic rim cylinder compatible with a wide range of rim locks.

- 🔑 Security class: 2
- 🛡️ Gerda product security class: 6
- 🔑 Number of keys: 3

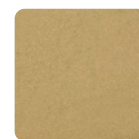

### Parameters

### Colours

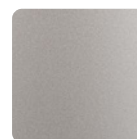

### Certificate

1	6	0	0	0	B	2	0
---	---	---	---	---	---	---	---

Cylinder classification acc. to PN-EN 1303:2007  
Certificate issued by the Institute of Precision Mechanics

brass

satin nickel

### Specification

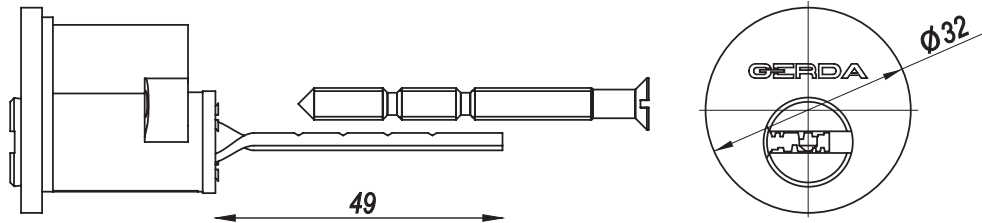

- key code security class 2
- 5 active pins
- hardened nickel-plated steel anti-drill pin in the body of the cylinder
- highest durability of the mechanism – over 100 000 cycles
- body made of brass
- high corrosion resistance
- the set includes three keys and two fixing screws

### Available options

- Keyed Alike system\*
- optionally with additional number of keys\*
- compatibility of the cylinder with ZN and ZG rim locks\*

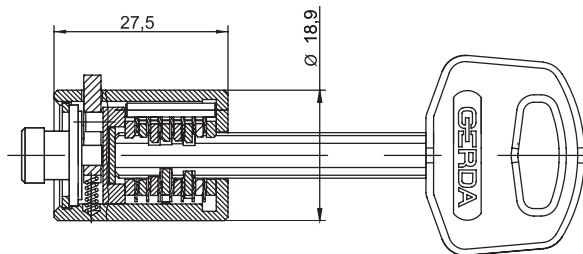

\* available on special order

Padlock classification acc. to PN-EN 12320:2013  
Certificate issued by the Institute of Precision Mechanics

satin nickel

### Specification

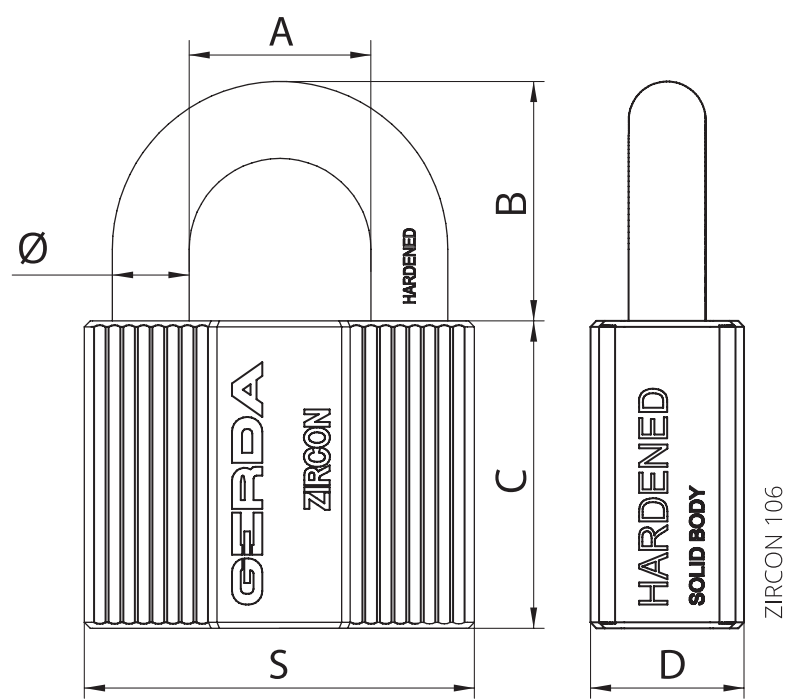

- the highest possible security class 6 (according to PN-EN 12320:2013) thanks to which the ZIRCON padlock meets the legal and technical requirements for the protection, transport and storage of weapons, ammunition and other dangerous materials and tools
- the GERDA CL disk locking mechanism is tamper-proof, and has a durability of more than 10,000 use cycles
- the shackle with a diameter of 13 mm is made of the highest quality hardened alloy steel, guaranteeing protection against mechanical attacks such as cutting, twisting, ripping (resistance up to 12 T)
- hardened steel body additionally reinforced with galvanic coatings guarantees weather resistance and protection against attempts to mechanically open the lock by drilling, sawing and hammering
- the shackle can be locked on both sides
- available with additional padlock protection for increased security (ZIRCON 116)
- the set includes three symmetrical milled CL12 keys and a code card allowing to make additional keys at authorised key cutting shop

### Available options

## SECURE KSWS / KSWW

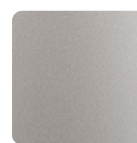

The padlock is mainly used in areas with high exposure to dust and grease, e.g. workshops, production halls, paint shops and storage areas.

🛡️ Gerda product security class: 6 / 7

🔑 Number of keys: 3

### Parameters

### Colour

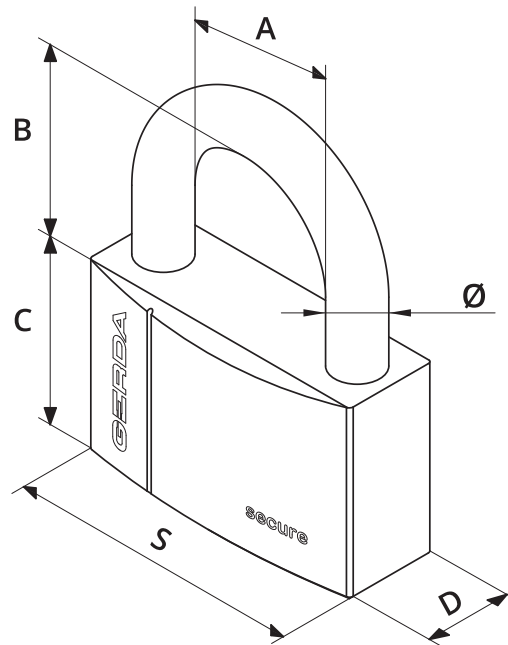

satin nickel

### Specification

- solid brass nickel-plated body
- chrome-plated hardened steel shackle
- disc mechanism resistant to dust and dirt
- hardened steel ring securing the cylinder
- drain hole increases corrosion resistance
- locking of the shackle with steel balls on both sides (from size S50)
- key lock when padlock is open
- available in a multipack (set of 2, 3 or 4 padlocks in Keyed Alike system)
- available version with additional padlock protection
- available version with a long shackle, making it easier to use the padlock in unconventional places
- the set includes three milled keys

## BRASS LINE KMZ

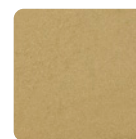

The padlock is designed for general use and for securing property of small value. It is perfect for locking gates and in places such as allotments and window bars.

🛡️ Gerda product security class: 4 / 5 / 6 / 7

🔑 Number of keys: 3

### Parameters

### Colour

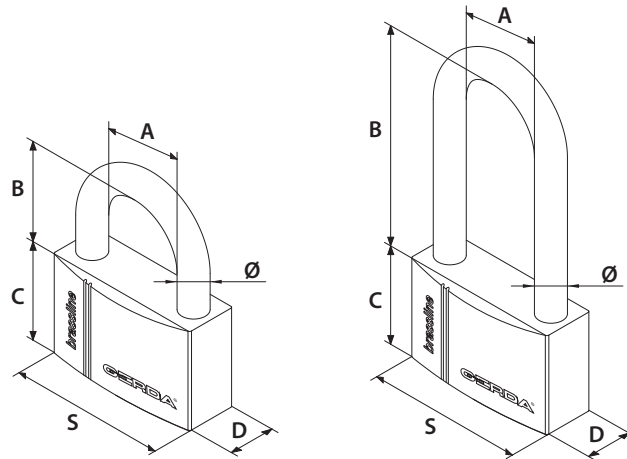

brass

### Specification

- solid brass body
- chrome-plated hardened steel shackle
- snap-locking mechanism allows the padlock to be closed without a key
- drain hole for increased corrosion resistance
- available in multipack (set of 2, 3 or 4 padlocks in Keyed Alike system)
- available in straight shackle version or combination code
- available version with a long shackle, making it easier to use the padlock in unconventional places
- the set includes three keys

## AQUA MODUS

A padlock with a cover to protect against severe weather conditions and mechanical damage. Thanks to its PVC cover, the padlock is ideal for securing truck trailers, generators and machine unit housings.

🛡️ Gerda product security class: 5 / 6

🔑 Number of keys: 3

### Parameters

### Colour

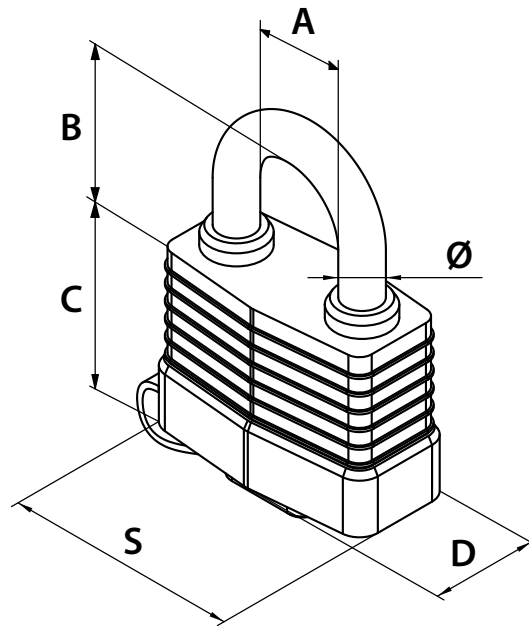

navy blue

### Specification

- body made of plates of hardened steel, in a PVC cover
- hardened steel shackle, additionally with a PVC cover
- unique combination of robust materials and additional protective plastic provides a combination that protects against both mechanical factors and severe weather conditions
- snap-locking mechanism allows the padlock to be closed without a key
- double-sided locking of the shackle (from size 45)
- plastic cap protecting the locking mechanism from the negative effects of dust and other types of dirt
- available version with a long shackle, making it easier to use the padlock in unconventional places
- the set includes three keys

## IRON LINE KZZC

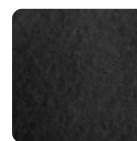

The cast iron padlock with shielded shackle is designed for general use and for securing property of small value.

🛡 Gerda product security class: 6 / 7

🔑 Number of keys: 3

### Parameters

### Colour

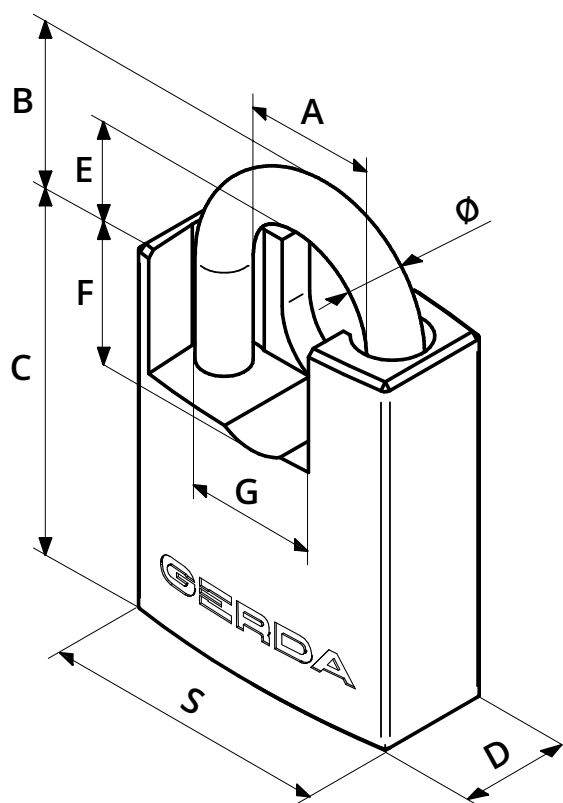

black

### Specification

- solid cast iron body
- shielded shackle made of chrome-plated surface-hardened steel
- snap-locking mechanism allows the padlock to be closed without a key
- locking of the shackle on both sides (from size S40)
- drain hole for increased corrosion resistance
- shielded shackle for increased padlock security
- the set includes three keys

chrome

### Specification

- highest security class 7 (according to PN-EN 12209:2005)
- mortise lock with three massive steel bolts
- used as the main lock on the door
- screwed steel case and riveted faceplate
- thanks to additional hardened cover it is resistant to drilling
- highest durability – over 200 000 cycles
- the lock design allows easy change of lock direction from right to left and vice versa
- spacing:
  - distance from the cylinder axis to the faceplate – 50 mm
  - distance from handle axis to cylinder axis – 90 mm
- lock compatible with cylinders with a cam
- screwed faceplate
- set includes mounting screws

## Technical data

## ZW 80

Universal mortise lock available in a wide range of options, suitable for different sizes and types of doors.

🔑 Security class: 1

🛡️ Gerda product security class: 4

### Parameters

### Colour

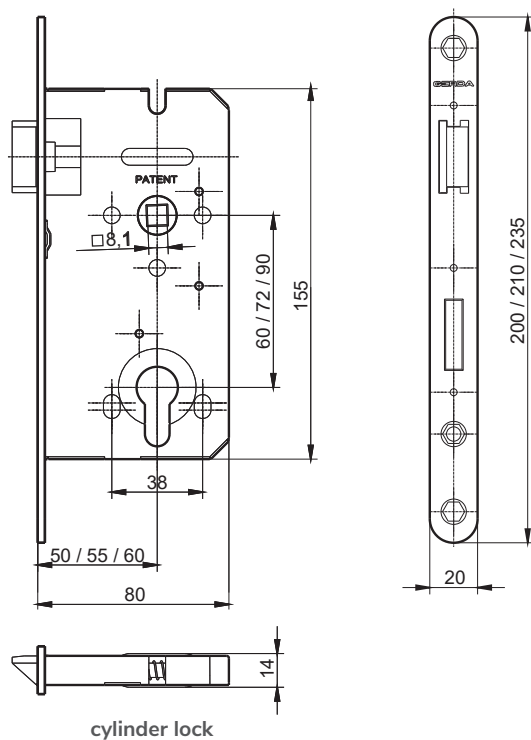

olive  
varnish

### Specification

- the spacing of the faceplate mounting holes and the case size are standardised to the dimensions most commonly used on the market
- riveted steel case and riveted steel faceplate
- the lock design allows easy change of lock direction from right to left and vice versa
- high durability – over 50 000 cycles
- lock available in the following configurations: for a cylinder, for a cam, for a key, or for WC doors
- available spacing according to the table with lock sizes
- set includes angled strike plate and mounting screws

## ZW 60

Mortise lock mainly designed for wicket gates.

### Parameters

### Colour

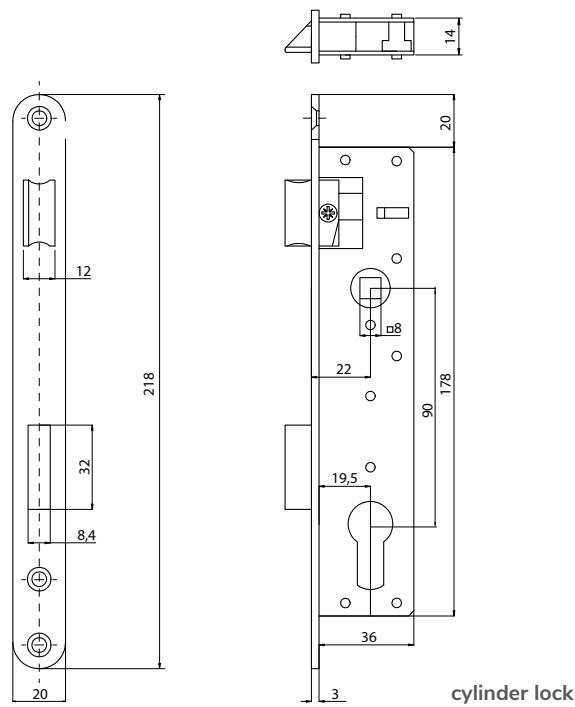

black

### Specification

- the spacing of the faceplate mounting holes and the case size are standardised to the dimensions most commonly used on the market
- riveted steel case and riveted steel faceplate
- available version of the lock with a latch designed for work with the handle
- available version of the lock with roller bolt without handle
- the lock design allows easy change of lock direction from right to left and vice versa
- lock with roller has adjustable roller depth
- lock available in the following configurations: for a cylinder, for a cam, for a key, or for WC doors
- available spacing:
  - distance from the cylinder axis to the faceplate – 22 mm
  - distance from handle axis to cylinder axis – 90 mm
- set includes angled strike plate and mounting screws
- available version of the lock for cylinder with a cam
- set includes flat strike plate and mounting screws

# TYTAN VARIANT A, B, C --- LOCK CODE RECOMBINATION SYSTEM

## Specification

- This is a system that makes it quick and easy to change the lock code from a temporary to target. The system is applicable in situations of temporary access to an apartment or a secured area. Locks of the TYTAN VARIANT group have a set of tubular A, B, and C keys. The A version keys are those used by the installer or service technician. Version B keys are target keys, they make changes to the lock code of the keys from version A. Version C keys are backup keys used in the event that version B keys are lost or stolen. Any key from version B or C changes the lock code.
- The lock code is changed by inserting the key from the respective set B or C into the lock and making one or two full turns. Cylinder recoding is automatic and the lock code is matched to the key from the respective set of versions B or C.
- Locks equipped with a VARIANT type cylinder mechanism have three sets of keys in the following quantities:
  - set A – 4 keys
  - set B – 3 keys
  - set C – 2 keys
- If the starter number of keys in set B or C is insufficient, the number of keys should be increased by making additional correct keys at authorised key cutting shop.

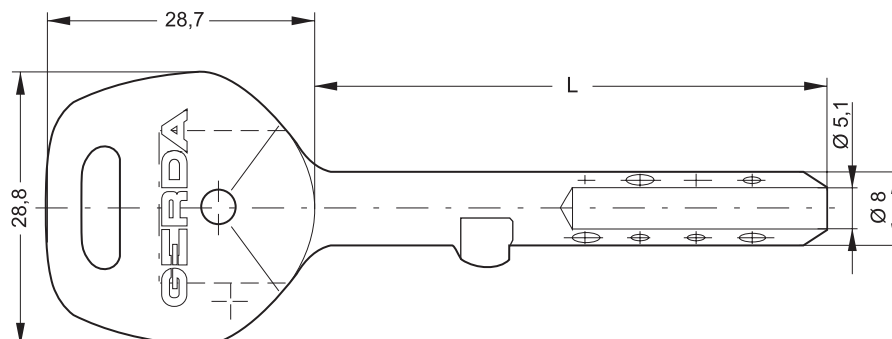

## Available options

- order the TYTAN VARIANT version of the product at an additional cost\*

\* available on special order

## Matching the lock to the thickness of the door

- In order to match the lock of the TYTAN series to the thickness of the door, it is necessary to use the correct keys and the appropriate escutcheon plate according to the table below:

Door leaf thickness	Key type	Escutcheon type
53 mm	GT2 (L = 48 mm)	flat, weather-resistant, reinforced
78 mm	GT8 (L = 73 mm)	flat, weather-resistant, reinforced
100 mm	GT7 (L = 95.5 mm)	flat, weather-resistant, reinforced
64 mm	GT2 (L = 48 mm)	concave
89 mm	GT8 (L = 73 mm)	concave
111 mm	GT7 (L = 95.5 mm)	concave

## G 1000 PLUS LOCK

- The G1000 Plus lock is designed for those who require the highest security standards. The G1000 Plus lock is equipped with a GTM1 tubular key. It is only available in one length – L=48 mm.
  - This lock does not work with GT2 keys (which have a different diameter of the key pin). GTM1 tubular keys for the G1000 Plus lock are available only at GERDA's main office in Sokołów. They can be ordered only through business partners and at authorised key cutting shop cooperating with GERDA.
- 
- Orders for the production of GTM1 keys must be placed in the GEOS system with additional information with a photo or scan of the code card sent by e-mail [mk@gerda.pl](mailto:mk@gerda.pl)
  - For the maintenance of our locks, cylinders and padlocks, we recommend a special GERDA product for precision devices requiring additional protection against corrosion and adequate lubrication to ensure long-term operation and maintain full functionality of the mechanisms. The product is available in aerosols in the following capacities: 25 ml, 100 ml and 400 ml.

## It is possible to produce non-standard versions of TYTAN series locks on special order:

- TYTAN locks with GT8 or GT7 keys
- TYTAN locks with additional number of locks
- TYTAN locks in Keyed Alike system
- TYTAN locks in Master Key system
- TYTAN locks in TYTAN VARIANT system

## G 1000 PLUS

Rim lock with an elegant aluminum housing, equipped with a modified mechanism of the TYTAN series that uses tubular keys with a smaller diameter – GTM1.

-  **Security class: 7**
-  **Gerda product security class: 12**
-  **Number of keys: 4**
-  **NATO Certificate**
-  **IMP (IPM) Certificate**

polished  
chrome

### Specification

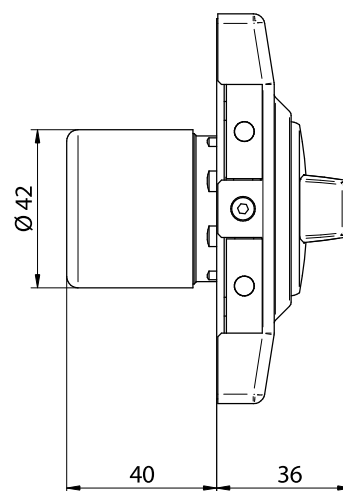

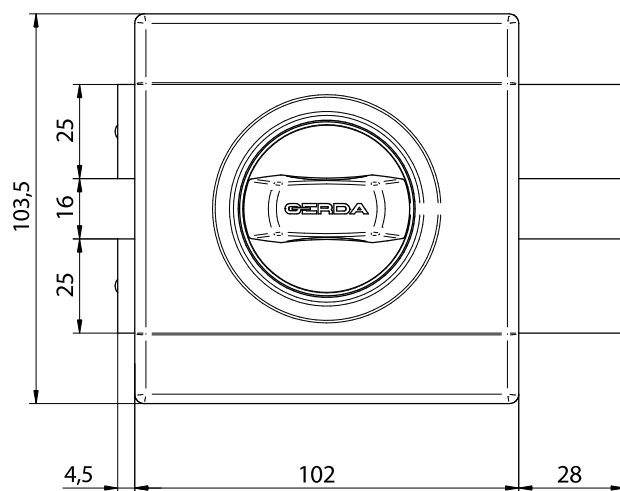

- highest security class 7 (according to PN-EN 12209:2005)
- the modified mechanism of TYTAN series guarantees a revolutionary number of key code combinations – more than 4 billion
- security guaranteed by solid steel bolts, which have been additionally reinforced by hardened ball-ended rollers (inside the bolts)
- fitted with a hardened plate to protect against drilling
- mounting suitable for both rebated and non-rebated doors
- universal design for both left and right hand doors
- for doors with a leaf thickness of 53 mm – GTM1 key (L = 48 mm)
- set includes: 4 special GTM1 tubular keys, fasteners and box strike plate in the color of the lock housing

### Available options

- unifying several G 1000 PLUS locks in Keyed Alike system\*
- Master Key system\*

\* available on special order

Lock classification acc. to PN-EN 12209:2005

Certificate issued by the Institute of Precision Mechanics

### Specification

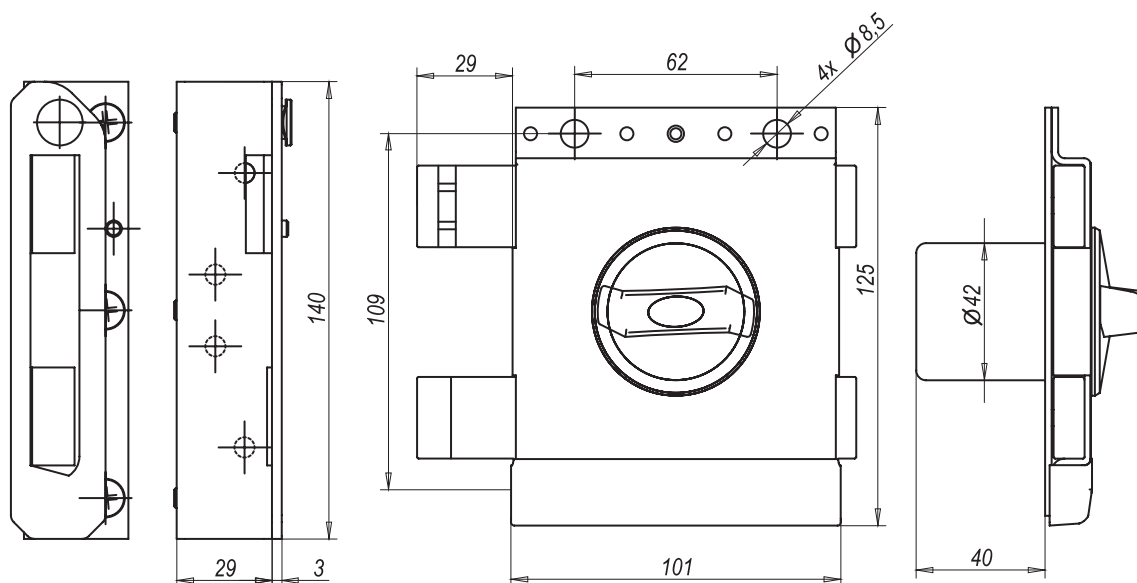

- highest security class 7 (according to PN-EN 12209:2005)
- the patented mechanism characteristic of the TYTAN series guarantees a revolutionary number of key code combinations – more than 4 billion
- steel body
- security guaranteed by massive steel bolts
- equipped with an anti-burglary blockade
- mounting suitable for both rebated and non-rebated doors
- lock in standard version designed for doors opening inwards
- available lock configurations for left or right hand doors
- in the standard version, the lock is designed for doors with a leaf thickness of 53 mm (GT2 key with length L= 48 mm)
- set includes: 4 tubular keys, mounting accessories and a high box strike plate with a door guard

### Available options

- lock with recombination of locking pins\*
- unifying several TYTAN series locks in Keyed Alike system\*
- Master Key system\*

\* available on special order

## Technical data

### Specification

- a modification of the classic TYTAN ZX lock.
- Rim lock on one side equipped with the lock cylinder, on the other with an alarm system and the thumb-turn used to open the lock
- protection class 3 according to PN-EN 12209:2005
- steel body
- alarm signal with a volume of 110 dB that is activated when a break in attempt is detected at a pressure of more than 50 kg
- alarm system coupled with bolts
- the patented mechanism characteristic of the TYTAN series guarantees a revolutionary number of key code combinations – more than 4 billion
- security guaranteed by two massive steel bolts
- equipped with an anti-burglary blockade
- suitable for rebated doors
- lock in standard version designed for outward opening doors
- lock configurations available for left and right hand doors
- in the standard version, the lock is designed for doors with a leaf thickness of 53 mm (key GT2 with a length of L= 48 mm)

Lock classification acc. to PN-EN 12209:2005

Certificate issued by the Institute of Precision Mechanics

#### Specification

- security class 2 according to PN-EN 12209:2005
- high durability – more than 200 000 cycles
- Zamac body
- corrosion resistance
- universal and easy installation
- can be mounted at a distance of 50 mm or 60 mm from the edge of the door leaf
- for door thicknesses from 38 mm to 68 mm
- universal design for both left and right hand doors
- mounting suitable for both rebated and non-rebated doors
- the spacers under the strike plate allow adjustment to different types of door rebates
- equipped with durable cylinders: RIM E1 (ZG 100) or RIM H PLUS (ZG 200)
- the set includes a lock, box strike plate, spacers, RIM E1 cylinder (3 keys) or RIM H PLUS cylinder (4 keys), fixing screws

### Colours

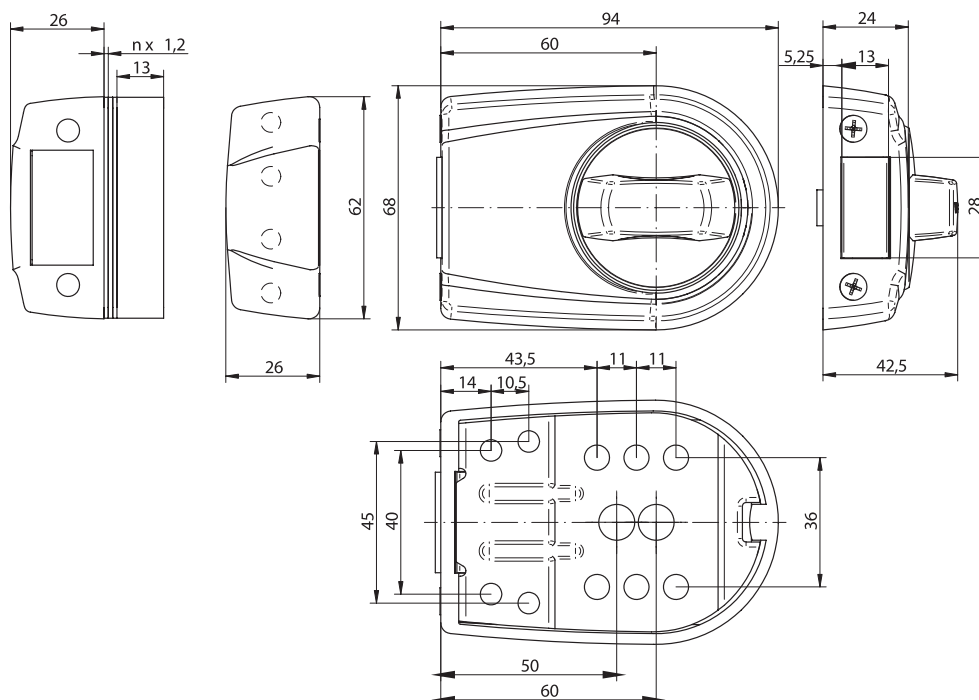

#### Available options

- unifying several TYTAN series locks in Keyed Alike system according to lock series: ZG100 lock – with RIM E1 rim cylinder or ZG200 lock – with RIM H PLUS rim cylinder\*
- special version of lock with RIM PRO SYSTEM cylinder (5 keys)\*

\* available on special order

### Specification

- closing force EN 3
- housing dimensions 176 x 50 x 38 mm
- assembly dimensions: width 60 mm x height 38 mm
- maximum width of the door leaf: 950 mm
- maximum weight of the door leaf: 60 kg
- two bolts allow to adjust the closing speed of the door within the angle range: 15°-180° and set the end latch arm in the angle range: 0°-15°
- maximum opening angle 180°
- operating temperature -40°C to 45°C
- compliance with EN 1154

Regular electric strike, 12V DC, power consumption 450 mA, galvanised silver, delivered in a box	5902203174548	0AERPA00000.92000P

## REGULAR ELECTRIC STRIKE 12V AC

The standard version of an AC electric door strike. Designed for remote/wired opening of doors, cabinets or wicket gates. It makes a characteristic “buzzing” when live (50 Hz).

### Parameters

### Colours

### Specification

- classification according to PN-EN: 14846:2010
- equipped with a standard version of the AC strike
- designed for alternating current (AC)
- allows doors to be opened with up to 15 kg of load
- power supply voltage: 12V AC (-/+2 V)
- power consumption: 400 mA
- operating temperature: -25°C to +55°C
- weight: 210 g

galvanised  
silver

Parameters	EAN	Index
Regular electric strike, 12V AC, power consumption 400 mA, galvanised silver, delivered in a box	5902203174463	0AERZA00000.92000P

## REVERSIVE ELECTRIC STRIKE 12V DC

The principle of operation is opposite to that of a regular electric strike – the bolt is locked under current. It is used with access control devices and in places where it is required to open all the doors after a power outage. The electric strike is designed for continuous live operation.

### Parameters

### Colours

### Specification

- classification according to PN-EN: 14846:2010
- power supply voltage: 12V DC { -/+2 V }
- power consumption: 200 mA
- operating temperature: -25°C to +55°C
- weight: 210 g

galvanised  
silver

Parameters	EAN	Index
Reversive electric strike, 12V DC, power consumption 200 mA, galvanised silver, delivered in a box	5902203174562	0AERRB00000.92000P

## ELECTRIC STRIKE WITH MEMORY 12V AC

It has so-called mechanical memory, which causes the bolt to open with one short pulse. The strike remains in the same position until the door is opened and closed again.

### Parameters

### Colours

#### Specification

- classification according to PN-EN: 14846:2010
- designed for alternating current (AC)
- allows doors to be opened with up to 15 kg of load
- power supply voltage: 12V AC {-/+2 V}
- power consumption: 650 mA
- operating temperature: -25°C to +55°C
- weight: 210 g

galvanised  
silver

Parameters	EAN	Index
Electric strike with memory, 12V AC, power consumption 650 mA, galvanised silver, delivered in a box	5902203174487	0AERMA00000.92000P

## ELECTRIC STRIKE WITH MEMORY 12V DC

It has so-called mechanical memory, which causes the strike to open with one short pulse. The strike remains in the same position until the door is opened and closed again. Unlike the AC electric door strike, this strike does not have protruding "sensors" and does not require the door to be precisely fitted with the frame.

### Parameters

### Colours

#### Specification

- classification according to PN-EN: 14846:2010
- strike adjustable in the range 0-4mm\*
- power supply voltage: 12V DC (-/+2 V)
- power consumption: 450 mA
- power consumption: 260 mA\*
- operating temperature: -25°C to +55°C
- weight: 210 g / weight: 170 g\*

galvanised  
silver

\* concerns low-voltage strike

Parameters	EAN	Index
Electric strike with memory, powered by 12V DC, power consumption 450 mA, galvanised silver, delivered in a box	5906726670525	0AERMB00000.92000P

## ELECTRIC STRIKE WITH SWITCH 12V AC

It has an additional mechanical switch for blocking the strike mechanism. It is often used in places where it is required to be able to open the door/wicket gate, for example, during working hours. A mechanical switch allows the electric door strike to go to into sleep mode (day/night function).

### Parameters

### Colours

### Specification

- classification according to PN-EN: 14846:2010
- designed for alternating current (AC)
- allows doors to be opened with up to 15 kg of load
- power supply voltage: 12V AC (-/+2 V)
- power consumption: 650 mA
- operating temperature: -25°C to +55°C
- weight: 210 g

OPTIC F	174
OPTIC M	175
CLASSIC DOOR VIEWERS	176

Digital door viewer

## OPTIC F 2,4"

A modern and electronic door viewer with 2,4" LCD display and 320 x 240 resolution with photo capture.

### Parameters

### Colours

### Specification

- LCD display: 2,4"
- resolution: 320 x 240 pixels
- memory: built-in
- battery with voltage regulator: 600 mAh
- camera: 0.3 MP
- device dimensions: 80 x 80 x 16 mm
- mounted in place of an optical door viewer
- material: ABS plastic, LCD display, PCB main board
- possibility to take picture from inside using the power button
- viewing angle: 90°
- mounting hole diameter: 14-28 mm
- door leaf thickness range: 35-120 mm
- outer hole diameter: 32 mm
- set includes micro USB charging cable

black

Parameters	EAN	Index
OPTIC F digital door viewer, door thickness 35-120 mm, screen 2,4", photo capture, black, delivered in a box	5902203345412	0ADWEF00000.06000P

Digital door viewer

## OPTIC M 4,3"

The door viewer features a large 4,3" display that provides a clear image of what is on the other side of the door. The image is clear even in very poor lighting conditions. From the outside in the camera housing there is a bell button, which activates the image display. It is possible to record on a standard memory card (micro SD) – the image is saved to be able to check later who visited the house.

### Parameters

### Colours

#### Specification

- LCD display: 4,3"
- resolution: 320 x 240 pixels
- image recording: YES, requires micro SD card\*
- built-in bell
- camera: 1 MP
- battery with voltage regulator: 2500 mAh
- lighting: LEDs, clear picture at night
- dimensions: 146 x 97 x 20 mm
- equipped with a motion detector – if the camera detects motion at a distance of 1-3 m from the door viewer, it will automatically record the image
- mounted in place of an optical door viewer
- material: ABS plastic, LCD display, PCB main board
- mounting hole diameter: 14-28 mm
- door leaf thickness range: 35-120 mm
- camera with dimensions of 60 mm x 60 mm
- viewing angle: 120°
- finish: black plastic covered with additional chrome-colored varnish
- set includes micro USB charging cable

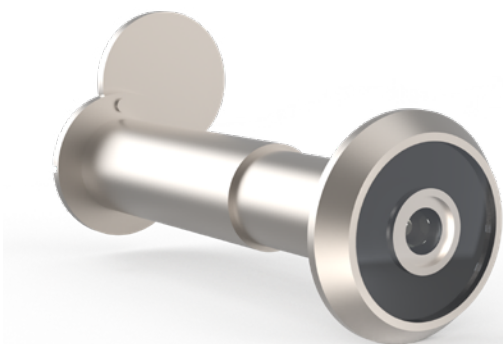

silver

Parameters	EAN	Index
OPTIC M digital door viewer, door thickness 35-120 mm, screen 4,3", photo capture and recording feature, silver, delivered in a box	5902203345429	0ADWEM00000.15000P

# CLASSIC DOOR VIEWER

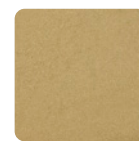

The classic GERDA door viewer satisfies all performance and aesthetic requirements.

## Parameters

- viewing angle: 200°
- fitted with a flap
- brass housing
- door leaf thickness range: 35-55 mm or 50-80 mm
- available door viewer diameters: 14 mm and 16 mm

## Colours

MASTER KEY SYSTEM

# MASTER KEY SYSTEM VELAR

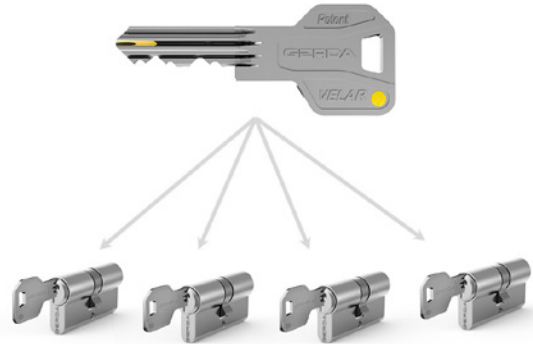

The Master key system consists of keys and various types of locks made in such a way that with one key it is possible to open the number of locks specified by the customer. The Master Key system may consist of various types of cylinders (patent), padlocks, cylinders for rim locks, industrial locks, furniture locks, etc.

## KEYED ALIKE SYSTEM

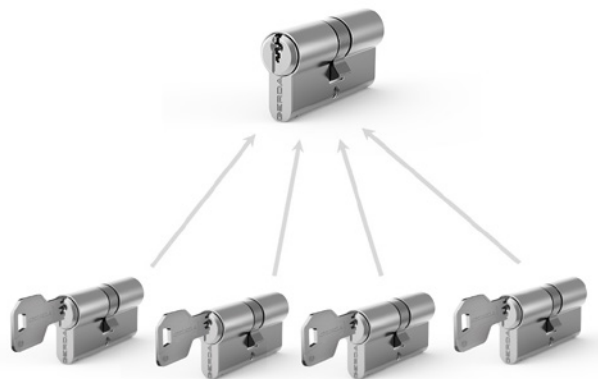

All cylinders are opened with the same key.

## MAIN KEY SYSTEM

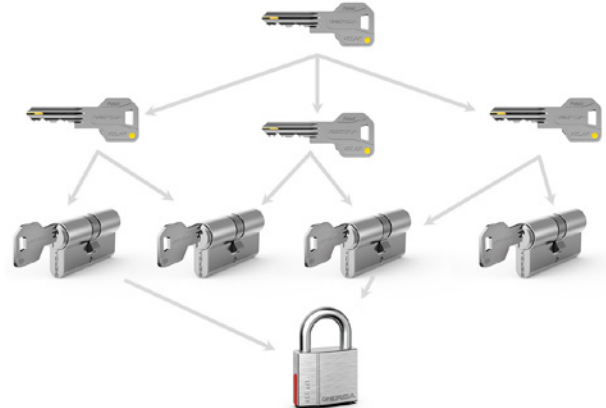

The master key opens all rooms inside the facility. Individual rooms are opened only with individual keys.

## CENTRAL CYLINDER SYSTEM

Individual keys to one room (apartment) also open common rooms/doors (wicket gates, staircases, entrances to the garage, trash enclosures, etc.). Particularly useful in residential areas.

## CENTRAL KEY SYSTEM

Designed for large office buildings, industrial buildings, schools, hospitals, etc. Depending on the organizational structure of the institution, there are several groups of keys in the system, subject to the master key which opens all doors in the entire system.

## CONTRA 900 5P

Bicycle chain lock – classic solution for securing bicycles.

5 mm round steel links.

Textile sleeve protects the bicycle from scratches.

Lightweight and secure chain.

Convenient double-sided key easy to use even in the dark.

Snap lock – even when the key is removed.

🔑 Type of key: P

🔑 Number of keys: 2

### BICYCLE CHAIN LOCK

Application	Securing inexpensive bicycles, prams and other. Securing the bicycle for a short time in a safe place.
Guidelines	It is recommended to secure the bicycle through the frame and rear wheel. It is best to attach the bicycle to a post, railing or other fixed architectural element.
Transport	Wrapped on seatpost, handlebars or transported in pannier.

# MAINTENANCE PRODUCTS

The product for the maintenance of bicycle locks, locks and cylinders allows for the cleaning and regular maintenance of the locking mechanism, which contributes to its long life and trouble-free operation. Application - inject a small amount into the hole of the insert, lock mechanism or padlock.

Available in 3 capacities:

25 ml,  
100 ml  
and 400 ml.

## MAINTENANCE

Application	The product cleans, lubricates, removes water, preserves and protects against corrosion all types of locking mechanisms.
Guidelines	It is recommended to clean and maintain the locking mechanisms of bicycle locks after each use in contact with moisture and dirt. It can also be used to clean, lubricate and maintain the bicycle.
