Maintenance product

Characteristics

The product for the maintenance of bicycle locks, locks and cylinders allows for the cleaning and regular maintenance of the locking mechanism, which contributes to its long life and trouble-free operation

How to use – inject a small amount into the opening of the cylinder, lock mechanism or padlock

Available in 3 sizes: 25 ml, 100 ml and 400 ml

Intended Use

The product cleans, lubricates, removes water, preserves and protects against corrosion all types of locking mechanisms

Notes

It is recommended to clean and maintain the locking mechanisms of bicycle locks after each use in contact with moisture and dirt

It can also be used to clean, lubricate and maintain the bicycle
